

## NEWFRAC

### New strategies for multifield fracture problems across scales in heterogeneous systems for Energy, Health and Transport

Call for the selection of two early stage researcher (ESR1) to be hired for participation in the projects “Total energy minimization with stress conditions for mixed mode fracture in anisotropic heterogeneous materials and structures” to be developed at the University of Seville, Spain, that is part of the European Training Network “New strategies for multifield fracture problems across scales in heterogeneous systems for Energy, Health and Transport” funded from the European Union’s Horizon 2020 research and innovation programme under the Marie Skłodowska-Curie grant agreement No 861061.

Call made on May 1, 2020

In accordance with the Minutes of the Selection Committee (attached to this document), and after rejecting the position the first selected candidate, it is proposed to hire the following candidate:

#### AMBIKAKUMARI SANALKUMAR, KARTHIK

Principal Investigator: MANTIC LESCISIN, VLADISLAV – Professor of Continuum Mechanics and Structural Analysis.

Based on this, the contract awarded to **AMBIKAKUMARI SANALKUMAR, KARTHIK**, may be a maximum of 36 months.

Seville, the date of the Signature of the Vice-Rector for Research
